

European emission standards plastic waste / domestic waste treatment equipment

Latest continuous feeding system in the pyrolysis process does not require a restart or stop, so it has more processing capacity. Compared with intermittent feeding system, powerful automation has the great advantage of the continuity system, reduced downtime and labor costs, improve work efficiency.

Processed raw materials □ Plastic, household garbage

Outputs & Application

CUSTOMER FACTORY

DELIVERING

Waste Oil

1 Engineers available to service machinery overseas

2 Tracking service for products for two years; lifetime warranty

3 Maintenance and experiment

4 Reminding for the service life of the wearing parts(Paid to provide)

5 Whole process install, guide, training from our engineer

6 Profile database for customer
