

Frame type oil refining equipment

This Frame type [oil refining equipment](#) our company design is for this customers who will use it to do test, or the capacity of one day is so small, like dozens of kilograms or 1 tons;

The machine is same as the big tonnage pyrolysis, it can pyrolysis waste tyre, plastic, oil sudge..... The big advantage is that you do not need to install, the machine has been pre-installed in our factory, when the machine arrive your factory, just to connect the power, then you can runing this machine directly.

Secondly, this machine is fixed in a frame, this means it is easy to delivery this machine, and we produce this pyrolysis machine all depend on the size of the container. The size will not bigger than the container's.

Below is the picture of the machine we designed for other customers:

Why Choose Us

17years experience in this pyrolysis industry

2 refining plant testing base, 2 producing factory, well equipped inspection and detection tools.

Professional team with rich R&D experience in environmental protection equipment recycling industry.

Sales area covers 20 provinces and cities of China. Exports to Canada, Australia, UK, Turkey, and Southeast Asia countries.
CE, certification.

Environmental protection equipment core technology national invention patents.
