

Features of Heavy oil burner:

1. Liquid atomized molecules are smaller and burn more fully.
2. Save fuel consumption by 10% to 20%.
3. Strong anti-corrosion ability, increase the service life of the whole machine
4. All parts are easy to disassemble, clean, repair and replace;
5. Can adapt to any type of combustion chamber;
6. Simple structure, easy operation and installation.
7. Fuel oil with high viscosity can be used
8. The size of the flame can be adjusted flexibly and the noise is small;
