

High profit waste solar panel pyrolysis machine in China

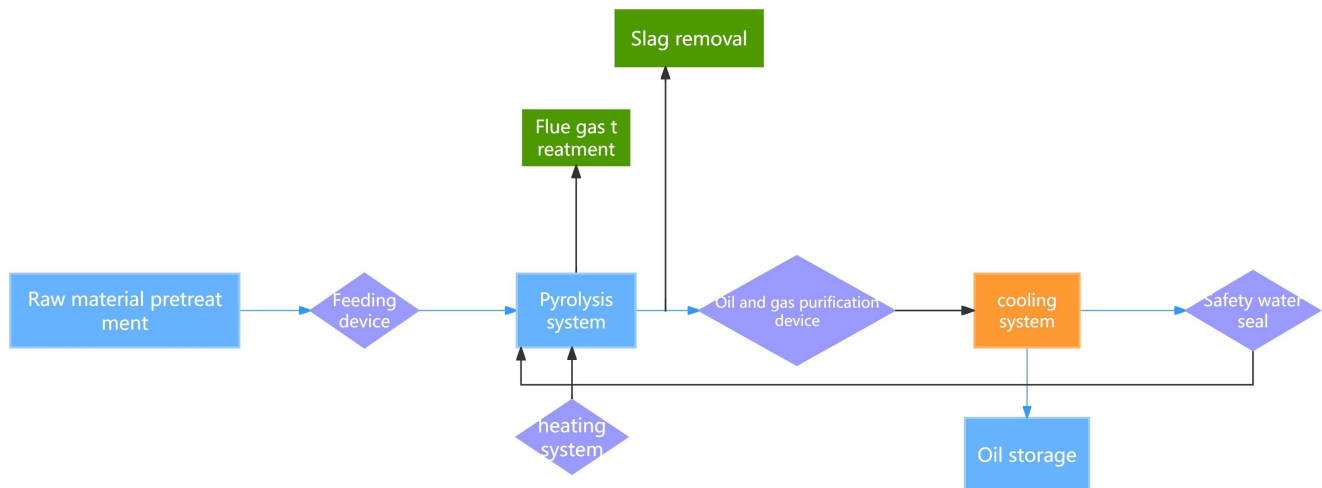

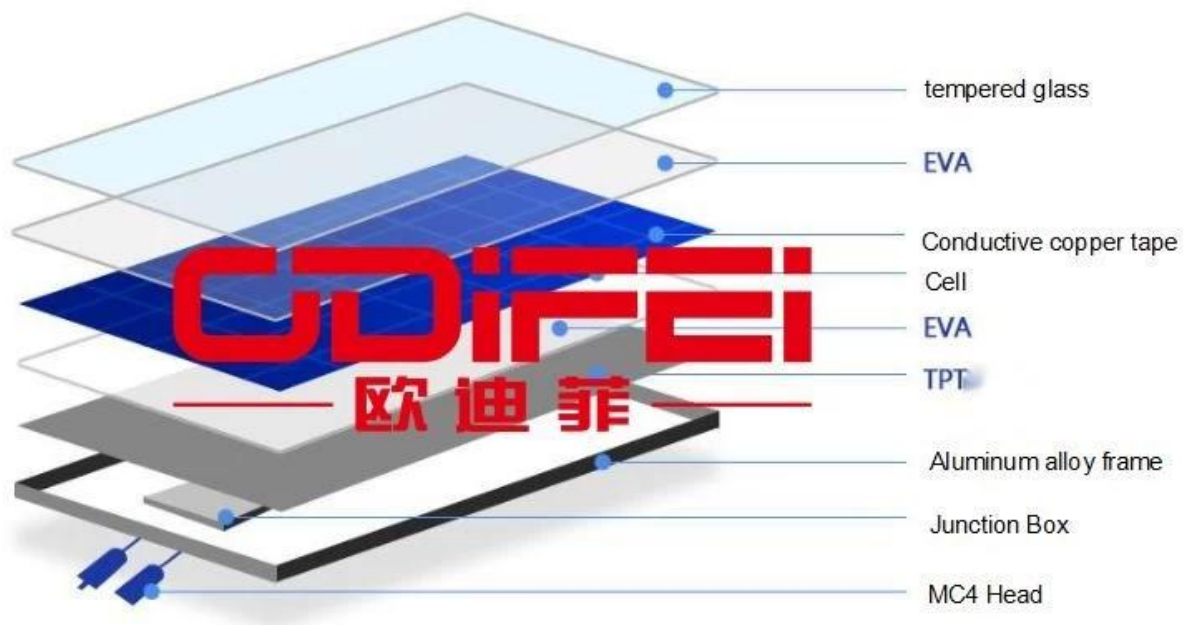

Mod:+86-13303710540

Email:doris@odifei.com.cn

Recommend

The main features of waste solar panel pyrolysis machine

Safety

- 1) Pressure gauge, alarming device, safe valve.
- 2) We have anticlogging device, in case of jam, there will be automatic alarming, automatic exhaust and automatic decompression.
- 3) Using 245R/345R boiler plate. The thickness is 14/16/18mm, other parts is 12mm.
- 4) Automatic welding, processing according to standard of head of pressure vessel.
- 5) With proprietary vacuum system, it is much safer on condition of negative pressure.

Energy saving

- 1) Exhaust gas recycle to furnace.
- 2) Continuous feeding with automatic feeder, no gas leak.

Environmental protection

- 1) Built-in slagging, seal with water, no solid pollution.
- 2) With dust removal equipment there is no air pollution.

DELIVERING
