

Refined oil

With the development of economy, the total quantity of waste oil, diesel oil gas, crude oil is increasing rapidly, the contradiction between environment and development will be more and more prominent, so we need to manage the waste immediately.

The technology and equipment which use waste rubber, plastic pyrolysis, pyrolysis oil, waste oil, diesel oil gas, crude oil refining developed by our company, the refining of gasoline, diesel fuel can be detected up to standards by the Quality Supervision Bureau, complementing the growing failure of the oil resources from the fundamental, turning waste into treasure, improving the ecological environment, and also to create greater economic and social benefits.

Waste Oil

Crude Oil

Transformer Oil

Engine Oil

Lube Oil

Gear Oil

Marine Oil

| NO. | Name | Percentage | Useage |
|-----|--------------|------------|---|
| 1 | Diesel oil | 80% | Add into engine using. |
| 2 | Gasoline oil | 10% | Add into engine using. |
| 3 | Heavy oil | 7-8% | Can put into pyrolysis machine processing Can as fuel. |
| 4 | Waste gas | 2-3% | Dispose it through gas treatment system. |

Advantage

The most advanced refining technology

Electric heating system, more uniform heating

No chemical ingredients are used in process

No need to wash oil, save the cost of buying acid, alkali.

No waste gas and waste water, no dust, no noise

Refined oil can reach the three standard diesel

During and after the process ,no soil ,water or air pollution is observed.
It is a 100% pollution free process,thus making eco-friendly enviroment.

Customer factory

our factory show

Waste Oil

1 Engineers available to service machinery overseas

2 Tracking service for products for two years; lifetime warranty

3 Maintenance and experiment

4 Reminding for the service life of the wearing parts(Paid to provide)

5 Whole process install, guide, training from our engineer

6 Profile database for customer
